

# TRAINING PLANS

Avon provides a number of product specific training courses. Training is provided at 2 levels.

## I. OPERATOR TRAINING:

Provides detailed training for initial product fielding and use. Operator training plans are developed to instruct a maximum of 10 students per course. Training plan includes:

- Sizing and fitting
- Correct use of the product
- Available accessories and spares
- Operator replaceable parts and maintenance
- Cleaning and product storage

## 2. SERVICE CENTRE TRAINING:

Provides detailed training for complete whole life maintenance and servicing. Service Centre training plans are developed to instruct a maximum of 5 students per course. Course content includes:

Complete content of the Operator Training Course defined above plus:

- Equipment requirements and procedures for whole life servicing schedules
- Service and maintenance tooling and equipment training
- Product testing requirements and test equipment training

## TRAINING DVDS

All training plans are supported with individual students notes. Training DVD's are also provided for some products where appropriate. Training notes and DVD's can be provided in regional languages, a quote for translation will be provided prior to ordering the training plan.

## TRAINING PLANS PROVIDED

Training plan costs include the training, all course materials and notes. Training provided at Avon's facility located at Melksham, England incur no additional cost. Training provided at a customer specified location will be quoted on an individual basis and will incur **additional costs** including any travel and accommodation costs.
