

# MITR™-M1 COMMUNICATIONS UNIT

## INTRODUCTION

The MITR-M1 Communications Unit enables clear communication in high-threat environments without compromising respiratory protection or putting the user at risk.

The MITR-M1 Communications Unit is a compact, high-performance voice system module built to integrate seamlessly with your MITR-M1 Half Mask.

Engineered for demanding operational environments, this durable unit provides clear and reliable voice transmission by connecting directly to your existing comms equipment. Whether you're in a fast-moving tactical operation or responding to high-stress incidents, it ensures communication remains intelligible, secure, and uncompromised.

With its in-situ rotation, the unit adapts instantly to your mission profile - keeping your cables managed, your profile low, and clear, uncompromised weapon sighting.

- Hands-free operation allows users to communicate without removing the mask or using hand-held devices.
- Connector: Nexus MP-101 2 pin female
- Connects to all Avon Tactical Mask Communications (TMC) equipment
- Connects to Avon VA-30 lapel mounted Voice Projection Unit (VPU), using adaptor cable
- No battery required to operate
- TMC radio communication operates with no batteries

## SPECIFICATIONS

Specifications	
Weight	10g
